### The Outlook

The outlook for the Occidental movement is steadily improving. There are signs that real progress is beginning and that the work of our few devoted pioneers is bearing good fruit. The German propaganda book will be published next year and this will, beyond a doubt, prove a milestone in the history of our language.

The news that 'Cosmoglotta' has found

it necessary to reduce its size is regrettable but it is **not** due to a weakening of our movement. The review has been supported by the generous donations of several friends but it has been decided that it will be more advantageous to utilise a larger proportion for propaganda for the present.

I hope all our friends who gave us support this year will continue to do so next year.

To the enquirers who are hesitating, may I offer a hearty invitation to join us and help in the great cultural task of offering to the

civilised world an international language adequate to meet its many needs.

Vive Occidental!
